

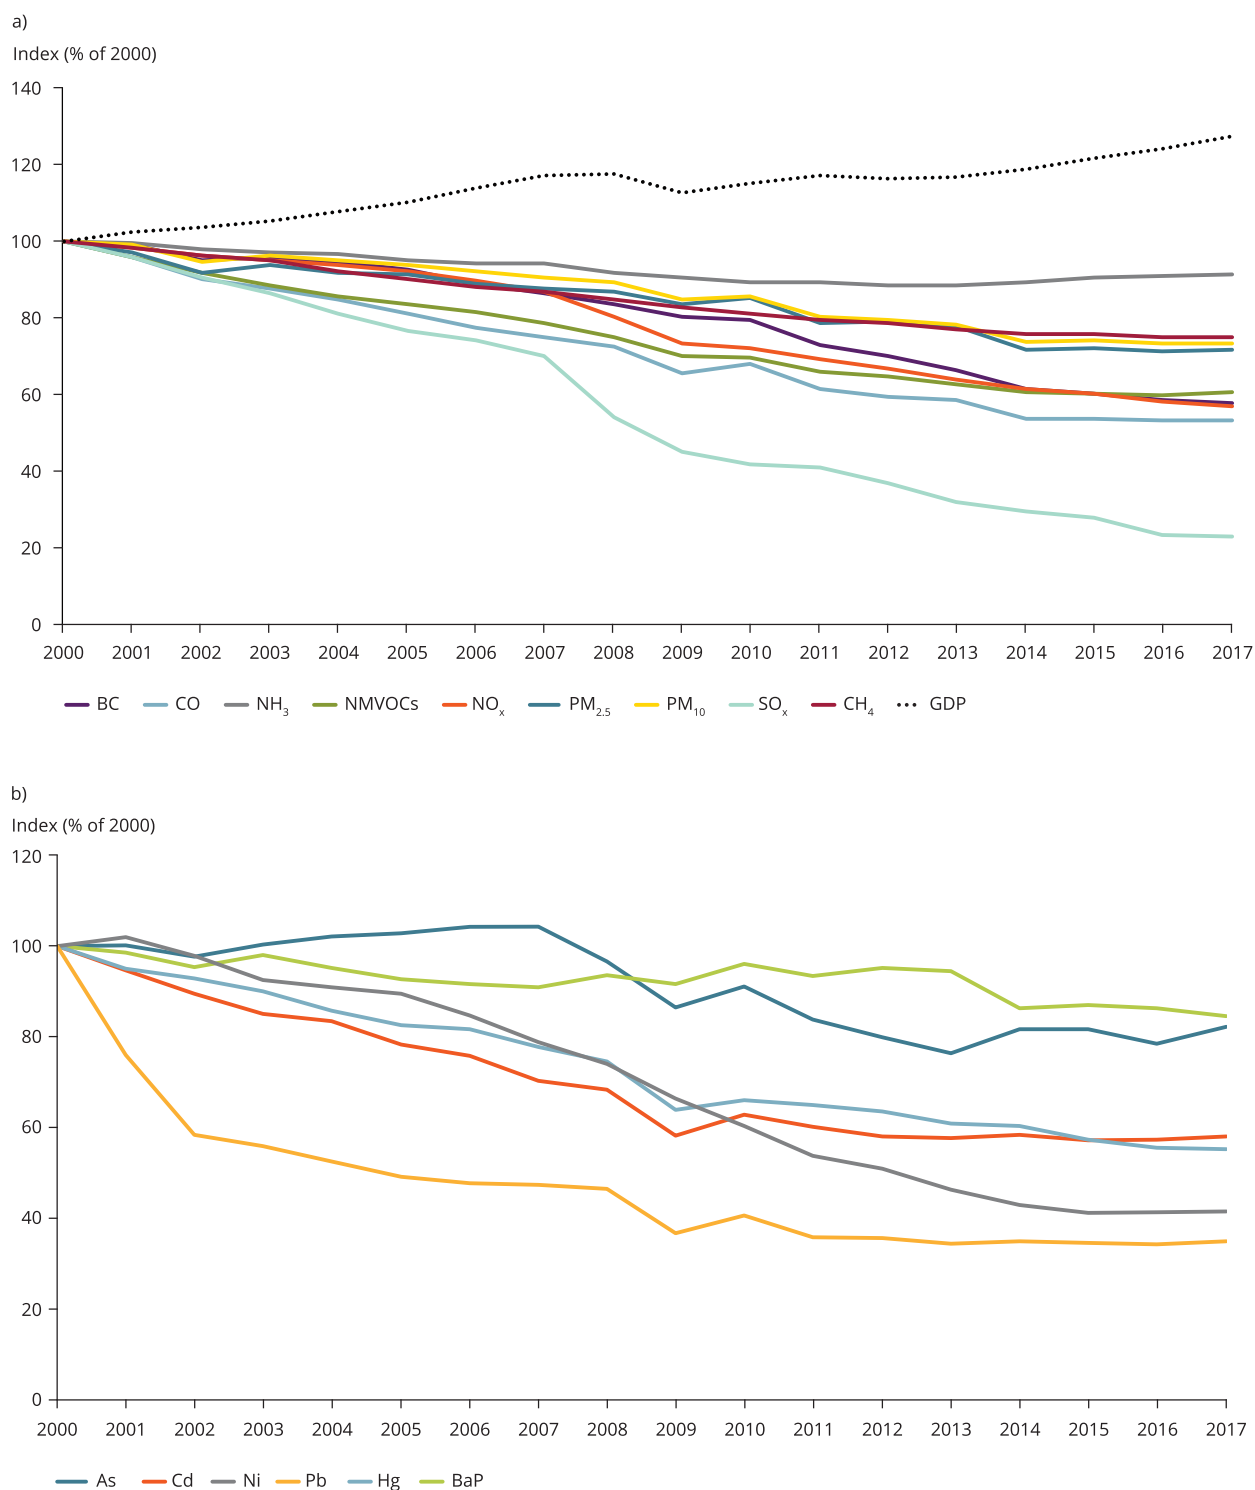

Figure 2.1 Trends in EU-28 emissions, 2000-2017 (% of 2000 levels): (a) SO_x , NO_x , NH_3 , PM_{10} , $\text{PM}_{2.5}$, NMVOCs, CO, CH_4 and BC. Also shown for comparison is EU-28 gross domestic product (GDP, expressed in chain-linked volumes (2010), % of 2000 level); (b) As, Cd, Ni, Pb, Hg and BaP

Note: CH_4 emissions are total emissions (integrated pollution prevention and control sectors 1-7) excluding sector 5: land use, land use change and forestry. The present emission inventories include only anthropogenic VOC emissions.
